

WARRIORS **KRAV MAGA**

PRESENTS

MARCUS WYNNE

NEURAL BASED PERFORMANCE for **Combatives seminar**

This seminar is for you if you train in, or teach any serious martial arts or Combatives system. Learn Marcus' unique methods of accelerated learning which will not only improve your own training leaps and bounds but will also enhance your ability to teach your students faster than you've ever taught them before.

Everyone knows mind-set is the most important aspect of fighting and this two day intensive seminar focuses on just that. Learn **State Access, Situational Awareness** and **Behavioral Acuity** as taught to various members on the tip of the spear.

This seminar has never been taught before in the US and never will again so it really is a once in a lifetime chance to train with someone who blew the NASA PhDs out of the water with his material.

WHO IS MARCUS WYNNE

He's hunted North Koreans in the DMZ, travelled to over fifty countries including many in the **"World's Most Dangerous Places"** list, helped coordinate the **evacuation of the American Ambassador** in Haiti, **trained Nelson Mandela's security forces**, worked as a Federal Air Marshal and trained counter terrorist forces around the world.

He was in the first ever (in the seventies) Air Marshals, has a background in several martial arts systems and trained body guard teams. He's also done his neural based work for clients including the **BMW Race Team, NASA and various SF groups**.

His accelerated learning training is legendary including training two Swedish Counter Terrorist operators in the use of the HK-MP5 who passed the qualification course after four hours. The course is normally four days long!!!
